DETAILED ACTION

Response to Quayle

Regarding claim 12, applicant failed to incorporate the suggested language into the claim. As such, the claimed subject matter remains unclear and indefinite. Note, first limitation of claim 12 presently stated “a power amplifier load circuit responsive to a power mode signal including at least one switch responsive to the power mode signal coupled between an output of the power amplifier circuit and a ground node;” Examiner suggests either first or second occurrences of “responsive to the power mode signal” should be deleted because if “at least one switch” including in a power amplifier load circuit, shouldn’t “at least one switch” inherently responsive to the power mode signal.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
